

抗生素治療及管理跨科研討會  
ID Talk Show EP2 - Abstract

Duo-perspective of the Management of Infectious Diseases

<b>Topic 1</b>	<b>Empirical treatment strategy for complicated intra-abdominal infections – Perspective on antibiotic prescription in the ER</b>
<b>Speaker</b>	童綜合急診科 陳浩業 醫師
<b>Abstract</b>	In the ER, physicians are tasked to assess patients with various symptoms accurately and come up with appropriate treatment plan in timely matters. Complicated intra-abdominal infections is prevalent condition faced in the ER. This section will discuss the current treatment options of this disease from the perspective of ER doctors and how to select antibiotics appropriate to the condition.
<b>Topic 2</b>	<b>Therapeutic options for MDR-GNB infections and antimicrobial stewardship</b>
<b>Speaker</b>	北榮感染科 林邑聰 醫師
<b>Abstract</b>	As antimicrobial resistance continues to be both a global and local health threat, promoting and implementing antimicrobial stewardship in hospital is crucial. This section will focus on the management and treatment of ESBL-producing bacteria and proper antibiotics management to combat antimicrobial regimes.
