

111 年奇美醫院胸腔內科臨床病例討論會

日期：中華民國 111 年 11 月 29 日(星期二)

時間及地點：16:00-17:00

課程活動題目：**Idiopathic pulmonary fibrosis in CxR**

主講人:謝俊民主任

主辦單位：奇美醫院胸腔內科

課程地點:10 樓討論室

教育積分：台灣胸腔暨重症加護醫學會

參加對象：主辦單位所屬院內醫師

聯 絡 人：蘇靖涵 (06-2812811-57115)

摘要:

Idiopathic pulmonary fibrosis (IPF)

- 5-6th decade; M:F = 1:1
- clubbing of fingers (83%)
- monocytosis/lymphocytosis on lavage
- increased occurrence of bronchogenic CA
- average survival of 4-6 years; 87% mortality

CXR findings:

- occasional ground glass pattern in early stage of alveolitis
- diffuse reticulations (60%) predominantly at bases
- honeycombing
- pleural effusion (4%); pleural thickening (6%)
- pneumothorax in 7% (late stage)
- progressive volume loss

HRCT findings:

- basilar predominance, subpleural distribution
- ground glass infiltrates in active disease
- septal thickening and distortion
- honeycombing
- traction [bronchiectasis](#)
