

113 年奇美醫院胸腔內科臨床病例討論會

日期：中華民國 113 年 02 月 27 日(星期二)

時間及地點：16:00-17:00

課程活動題目：Sjogren's syndrome in CXR

主講人：謝俊民主任

主辦單位：奇美醫院胸腔內科

課程地點：10 樓討論室

教育積分：台灣胸腔暨重症加護醫學會

參加對象：主辦單位所屬院內醫師

聯絡人：楊穎潔 (06-2812811-57132)

摘要：

Sjogren's syndrome is a chronic immunemediated inflammatory disorder characterized by lymphocytic infiltration of the lacrimal and salivary glands associated with the clinical features of **keratoconjunctivitis sicca** (xerophthalmia -dryness of eyes) and **xerostomia** (dryness of mouth).

SS exists in both a primary and secondary form (associated with other collagen disease).

Sicca Syndrome - dry mouth & dry eyes.

Prevalence：2 -5% of people aged 60 and above have primary SS.

Pulmonary features include Chronic bronchitis secondary to dryness of the tracheobronchial tree, lymphocytic pneumonitis, interstitial pulmonary fibrosis, and pseudolymphoma nodules; pleurisy and pulmonary vasculitis are rare.

1. Pleuritis
2. Interstitial fibrosis
3. Lymphocytic interstitial pneumonitis
4. Pulmonary vasculitis and hypertension
5. Desiccation of tracheobronchial tree
6. Pulmonary lymphoma and pseudolymphoma
